This list is designed to bridge a perceived gap in the recommended reading between recent journal articles, non-core journals and textbooks. This list is designed to contain articles the committee deems likely to inform or to impact on the clinical practice of veterinary ECC. We have made efforts to keep this list to less than 100 articles and we will review and update the list annually.

**ACID-BASE, FLUIDS, & ELECTROLYTES**

**ANESTHESIA/ANALGESIA**
